SUMMARY

Solution-oriented and detail-focused Manual QA Engineer with hands-on customer support experience, using AI to enhance productivity and efficiency. Skilled in functional, regression and API testing across desktop, web and mobile applications. The combined perspective of QA and client support gives an edge in understanding how users actually behave — insight brought directly into test cases while keeping everything aligned with business requirements. Currently expanding into automation testing with Cypress and building tools with Git & GitHub.

WORK EXPERIENCE

QA Operations / Analyst Commerce Acceptance Solutions (formerly Serino Systems Inc.) - Conduct quality control tests and analysis to ensure software meets or exceeds standards and end-user requirements. - Draft, revise and approve test plans and scripts to align with standards and IT strategy. - Create test data files with valid and invalid records to test program logic and verify system flow; coordinate UAT, alpha and beta testing. - Complete process analysis, identify procedural and control deficiencies, and recommend and implement solutions. - Generate testing reports translated into concise summaries meaningful to management and the business. - Provide testing support to end users and clients across different locations.	Jul 2024 – Present
Quality Assurance Engineer Hybrain Development Corporation - Conducted manual regression and integration testing. - Planned and created test cases; documented testing in Jira. - Worked within Agile/Scrum and Waterfall methodologies. - Responsible for creating release notes.	Oct 2022 – Jun 2024
Client Success Associate Hybrain Development Corporation - Catered to client issues and requests, monitored via the Jira ticketing system. - Escalated tickets to upper levels and consulted with the team on complex cases. - Created end-of-shift / end-of-day reports logging all tickets raised.	Mar 2021 – Jul 2022

PROJECTS

Medtrix — Healthcare ERP (HIS & LIS) - Manual functional and regression testing; authored test plans and scripts against business requirements. - Provided technical/remote support, monitored issues in Jira, and produced analysis reports.
School Management & Enrollment System - Manual and automated functional/regression testing; handled client data-manipulation requests. - Built AI-assisted tools that improved team productivity and efficiency.
Ads Management System — Electron Desktop App - Cross-platform tool syncing per-branch price-checker ad media from AWS S3; packaged as a Windows installer. - Replaced a manual, per-branch ad-update process.

EDUCATION

Bachelor of Science in Engineering Technology Technological University of the Philippines	Nov 2019 – Sep 2020
Diploma in Computer Engineering Technology Technological University of the Philippines	Jun 2015 – Aug 2018

KEY SKILLS

- Manual & Automated Testing - Functional & Regression Testing - API Testing & Data Validation - Test Plans & Test Scripts - Bug Triage & Reporting	- Desktop, Web & Mobile Testing - Technical & Remote Support - Escalation Handling - Problem-Solving & Communication - AI-Assisted Tooling
